September - December 2022

Facilitator: Rob

# Fem Entity Website Project Overview

# Fem Entity - Your Source for self care, empowerment and community

Mukisa and Irene have embarked on a journey to help people redefine what balance looks like by going back to our roots and honoring our feminine and masculine energies. With the values of self care, empowerment and community at its core, they've curated a diverse directory that collaborates to bring events, experiences, workshops and courses around to embrace the divine feminine and masculine energy.

# Project: www.fementity.ca

- Integrate POS System
- Integrate Events Calendar
- Directory Database
- Styling and Connectivity
  - Lvl Up Boutique
  - LMS pages

- Mukisa Kakembo: <a href="mailto:mukisak@hotmail.com">mukisak@hotmail.com</a> | 902.818.8545
- Instagram @fem.entity

# Overall Objective;

To continue on the successes of previous Dalhousie students in creating a multi-layered website that can be the main source of reliable information for clients to use through their self-discovery journey. This semester will focus on integration of the POS system (Sona Pay) and the Events Calendar. We will also continue styling and connectivity of LvIUp Boutique and the LMS pages.

# **Integrate Events Calendar**

Description: Integrate a Calendar view to the main page of the website, aligned with our current branding and connected to our POS system to be able to purchase tickets through our website. On the users profile page, have a view of past events that the user has attended and see upcoming events that they have registered for.

Repository: <a href="https://github.com/jquense/react-big-calendar">https://github.com/jquense/react-big-calendar</a>
How it's supposed to look:

http://iguense.github.io/react-big-calendar/oxamples/index.html?path=/decs/oxamples/

http://jquense.github.io/react-big-calendar/examples/index.html?path=/docs/examples--example -2

# Pages Needed to be created:

- Month View calendar page (tab on navigation bar)
- Administration Event Creation page (accessible to administration only)
- Event landing page (event detail & call to action)
  - Connect to "add to cart" page

Outcome: Have a calendar display available on the main page of the website. Allowing people to view details, share and register for upcoming events, workshops and webinars.

# **Integrate POS System**

Description: Integrate the SONA PAY POS system and Bambora Gateway, for Fem Entity to accept payments through their website.

Installation of Bambora (worldwide payment gateway) API: <a href="https://www.bambora.com/en/us/">https://www.bambora.com/en/us/</a> Connect Bambora to SonaPay POS: <a href="https://sonapay.ca/">https://sonapay.ca/</a>

SonaPay Needs to connect to the following web pages (pages are made, but not connected)

- "Cart" (main page for final check out)
  - LvIUp Boutique (add to cart button)
  - Memberships Page
  - Business Form Page
  - Calendar Event Landing Page
  - LMS Course Page

Outcome: Have SONA Pay as our POS System, enabling us to have our Boutique transactions, Memberships, Subscriptions, LMS Courses and Event/Workshop registrations be purchased in a single location.

# **Directory and Membership Database**

Description: Create and connect backend database to front end Directory Search engine page. Currently, all Directory information is held in an Excel folder Research will need to be done on the best database to hold client and business information.

Connectivity
Directory Database - Directory Member Page - Directory Search Page
Membership Database - User Page

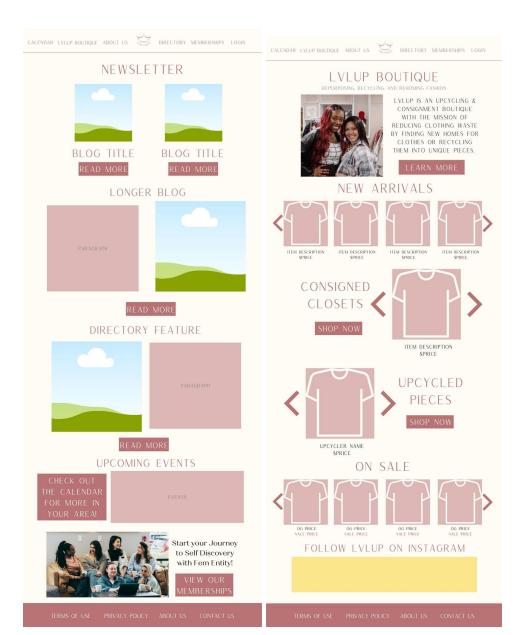

Outcome: Have a functioning Directory Search feature with a secure database that populates the front end business pages. To also have the same database hold membership information in a different group that is connected to user functionality.

# **Styling and Connectivity**

Description: Styling edits need to be done to align with branding. Majority of pages are created, still need to be connected to the front end of the website.

Following Pages to be styled;

# LVLUP BOUTIQUE

### STEP 1:

DECLUTTER YOUR CLOSET!

# STEP 2:

REACH OUT TO US TO HAVE IT PICKED UP
